

# COSMETIC BODY RESTORATIONS

Made from plaster cast

Centri's cosmetic body restorations are made from skin coloured natural latex. The material is porous and lightweight. Cosmetic body restorations are now available with a silicone coating in many different colours.

Whole cosmetic calves are normally applied directly onto the skin with a zip fastener on medial side.

Partiel cosmetic restorations and shoulder restorations are normally applied directly onto the skin and help in place with skin adhesive.

Please note that the cosmetic body restorations without the coating are sensitive to longer exposure to UV-lights as this breaks down the material.
